NUTTERS
EVERYDAY NATURALS

Big Friends –

The greatest kindness parents can give their children is setting an example of healthy nutrition.

KARLENE KARST, BSc Nutrition

“My kids love them! As a nutritionist and busy mom of three, smoothies are my favourite way to start our day. They’re an easy way to meet daily nutritional requirements. Most kids tend to be small eaters, so boosting nutrition with a delicious smoothie is a great way to sneak in those extras, and make every bite count. Kids All-In-One shake – approved by kids and moms – is 100% organic and vegan, even the flavours and sweeteners. That’s unique!”

Adding a little Sea-licious makes it more delicious!

39⁹⁷
powder

Leia’s mother shared that at two years old, her daughter developed a real love for protein shakes because every morning she saw her mom making and drinking her shakes – she wanted the same!

Leia loves her protein drink and her protein drink loves her

Sea-licious –

Fish oils have come a long way from the days of rancid-tasting cod liver oil. When I was formulating Sea-licious, I decided that the most honest and discerning taste testers I could find were my two boys, who were four and two years old at the time. Along with their group of friends, spoon in hand, I would let them try the flavours and listen to their feedback. If you can get a child to say “yummm” to any flavours of fish oil, then you have a winner! Over the last 10 years I have had countless moms share the most adorable and heart-warming stories of their kids standing at the fridge, asking for more Sea-licious. To these little taste buds, it smells and feels like a treat.

11⁹⁷

Wonderfully delicious chewables

Big Friends –

Give your active, growing children delicious, meaningful nutrition with Big Friends

If you feel your child isn’t getting what they need from their diet, consider adding some **foundational supplements**, such as a **multivitamin and minerals**, **vitamin C**, **vitamin D** (especially during the winter months), and an **omega-3**. These will go a long way in helping boost their immune system and support brain development.

Big Friends supplements are hypoallergenic, containing **no animal products**, **artificial colours**, **preservatives**, **dairy**, **starch**, **wheat**, or **yeast** – just a complete range of high-quality vitamins and minerals.

You can't **outrun** your fork

A must-hear interview with
Dr. MICHAEL LYON,
world expert
on how easy
it is to trim down
for life...

WATCH THE FULL INTERVIEW AT
<https://l.ead.me/realeasy>

Michael Lyon, MD is the Medical Director at the Obesity Medicine and Diabetes Institute, a UBC faculty member with over 30 years of practice, and a published researcher in the fields of nutrition, appetite, and blood sugar regulation. He is Board Certified in Obesity Medicine through the American Board of Obesity Medicine.

DR. LYON highlights

“People can grow up in environments that are very harsh. Maybe they have medical issues that have led to weight problems, or they’re on drugs that lead to weight gain.”

DR. LYON highlights

“The simplest and healthiest way to lose weight is to follow a partial meal replacement diet. There are hundreds of research projects looking at this approach. Very simple, very healthy. I use meal replacements myself, and I’ve discovered that’s the only way to lose weight realistically for me now.”

Losing weight is *real easy*

JULIA SOLNIER, PhD reports on the results of the latest completed study using **RealEasy Meal Replacement with PGX**, where participants took part in a 12-week weight-loss program. Participants could choose to use either a whey or vegan protein-based meal replacement. All participants who completed the 12-week program **achieved excellent results with an AVERAGE WEIGHT LOSS OF 7%**. One critical aspect for successful weight loss is to maintain satiety while following a low-calorie diet. In this study, **98% of participants reported a greater feeling of satiety, including reduced appetite/hunger and food cravings, after drinking RealEasy shakes**. Besides that, 81% of study participants observed positive effects on their gut health, such as improved **digestion and stool frequency**; with more

than 85% of participants reporting **positive side effects on sleep quality** and duration, mental health, including **higher energy levels, and improved skin health**. When study participants were asked for their experiences with RealEasy, they described the meal replacements as an easy solution to lose weight and maintain the weight loss, and as a convenient program to continue. Having two meals per day of RealEasy with PGX can provide satiety, control hunger, while replacing unhealthy, heavy carb-laden foods. Various ideas and tips have been shared as to how to customize the shakes and give them an extra special flavour. Among the favourite ingredients, which were added for variety, are fruits such as berries or bananas, as well as coffee.

It's real easy to
control your fork

Reduce just 5% of your body weight and get huge health benefits for life.

Study participants who tried *many* different (unsuccessful) diets over the years, called the RealEasy program a transition from “diet” to “life” resulting in a big change of eating habits.

The RealEasy meal replacements are filled with optimal amounts of macro- and micronutrients, and provide a high-quality protein source, such as whey concentrate and isolate. Whey protein is quickly absorbed by the body and contains a higher range of the branched-chain amino acids (BCAAs) leucine, isoleucine, and valine, which are particularly helpful for weight loss without losing muscle mass.

49⁹⁷
powder

WHEY

Vanilla, Chocolate, and Strawberry flavours

VEGAN

Vanilla and Chocolate flavours

Whey protein, especially whey isolate, offers significant benefits even for individuals with lactose intolerance or lactose sensitivity. Another main component in the RealEasy shakes is PGX. PGX is not only a promising candidate for weight management/loss, but also for reducing obesity-associated risk factors, such as diabetes and high cholesterol, as shown in many studies.

Protective Measures for IMMUNE SUPPORT and Aging Immune System

Breakthrough in ABSORPTION TECHNOLOGY

Until now, one of the biggest challenges with quercetin has been its lack of water solubility. We have overcome this challenge with our latest technology: a unique liquid micelle matrix. This **groundbreaking process solubilizes quercetin into liquid**, allowing it to be **absorbed up to 10 times better** than regular quercetin.

Why blood vessel protection is more important than ever

Emerging research suggests that some viruses may cause blood vessel damage, often in response to the body's inflammatory response. This causes a great deal of stress to the immune system. The unique antioxidant effect of quercetin supports healthy blood vessels by reducing the oxidative damage to vessel walls. Such protection even extends to the capillaries, which supply nutrients and oxygen to every cell in the body.

Quercetin LipoMicel Matrix — A novel delivery system to enhance bioavailability of quercetin

Based on study results published in a peer-reviewed Canadian journal*, the LipoMicel formulation achieves significantly higher blood concentrations of quercetin and provides up to 10 times higher absorption than regular quercetin. Quercetin LipoMicel represents an efficient delivery system for enhancing the absorption of quercetin in the body, and thus promotes its wide-ranging health benefits. To date, the low-absorption rate of quercetin in the body has been one of the greatest challenges to overcome. For this reason, Quercetin LipoMicel has been designed to improve the uptake of quercetin and boost its therapeutic potential.

Making a DIFFERENCE...

We are committed to the health and imagination of children who all deserve a chance to dream and reach their full potential. Learning the beauty of how Earth supports and sustains our lives is important for

children to understand. How can we all support this? **Start with the seed and how it germinates and grows. It's so simple** – at least it appears that way to us. **Great simplicity creates amazing results.**

Follow us or become
a member at
seewhatgrows.org

“Teach a child to plant
a seed while they are still
open to learn, and let them
see what grows.”
– Roland Gahler

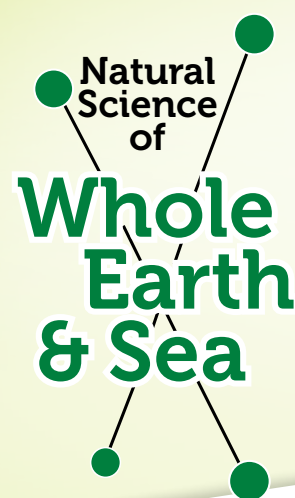

Our children are beautiful seeds that can grow wonderful personalities if we encourage their imagination, the dreams of how things work, and the possibilities of what they can do in life. If our children can understand the importance of working with the Earth and not against it, how incredibly can things change!

That's the hope of **Plant a Seed & See What Grows Foundation®** – educating through schools, communities, and families. You can make a difference, like our key sponsor **Whole Earth & Sea supplements** – wholeearthsea.com
All support is welcome.

Wonderful Whole Earth & Sea...

The fabulous work of our sun, earth, and sea sustains
all our lives and is easy to understand.

We've learned, like so many others, that our earth is incredible and to work with it, not against it. We understand how it saves and supports our healthy life and we are all aware that we need to stop disrupting it – as only man can.

On our farms we work with the natural cycles of the earth. Our lands are 100% certified organic non-GMO. Our crops are fertilized with compost and nitrogen-rich sea plants and are meticulously cared for by hand. No synthetic pesticides at all are used – EVER! Just how things were done from the beginning of the Earth.

The 100% organic, non-GMO nutrient-rich plants grown on Natural Factors farms are harvested at their peak and immediately raw processed at our own facilities, using our proprietary EnviroSimplex® method to retain the vital bioenergetic vitamins, minerals, enzymes, phytonutrients, and antioxidants.

Natural Factors farms are certified 100% organic non-GMO. Our crops are fertilized with compost and nitrogen-rich sea plants, and are meticulously cared for by hand. **No synthetic pesticides (or even permissible organic pesticides) are used – EVER!**

Making a difference Whole Earth & Sea is carbon-neutral

The evidence is piling up!

At Whole Earth & Sea, we produce clean, organic, raw-processed supplements of the highest quality possible. We don't just care about the quality of the ingredients that go into all our products, but we also recognize the importance of addressing our environmental impact and are committed to reducing

emissions wherever possible. That is why we are excited to announce that we are a certified carbon-neutral business!

Even when you grow certified organic non-GMO plants, **it's important to verify that there are no GMOs or other contaminants present.** We excel at making sure that every possible test has been conducted to ensure you receive the safest, most beneficial products possible.

In our state of the art laboratories, **we use "mass spectrometry" to test for up to 800 substances.** Mass spectrometry can test at the molecular – even atomic – level, detecting environmental pollutants such as pesticides, herbicides, and fungicides, as well as heavy metals and other undesirable substances.

Redefining *beauty* is accomplished from the inside out

Think **COLLAGEN** – our experts do!

“As a 30-something-year-old woman and nutritionist (who’s not getting any younger), collagen has been one unique product that I had my eye on. Why collagen? Unfortunately as we age, collagen density and dermal thickness decrease, and this lack of collagen cues the all-too-familiar signs of skin aging. No wonder we’re obsessed with trying to get more of it.

What some critics say are concerns: Admittedly, collagen has been a hot topic and for good reason. We all want to look younger, so a product that touts any sort of beauty benefits will no doubt come under a lot of scrutiny. In recent years there has been a growing body of evidence and even larger review studies that collectively point

to the same conclusion – collagen supplements promote healthier looking skin, and decrease visible signs of aging, without any adverse side effects.

Another concern that has been shared is that there may be a risk of contaminants and heavy metals in collagen. Although there is merit to this, the truth is that not all collagen supplements are created equally. When choosing a collagen supplement that is **bovine (cattle)** sourced, it’s best to look for a product that is pasture raised, grass fed, and steroidal-hormone- and antibiotic-free. When choosing a **marine-based** collagen supplement, always look for one that is extracted from wild-caught and sustainably sourced fish, like whitefish.”

NATASHA PAROUTIS,
Nutritionist

Why Total Body Collagen? Revitalize, restore, and protect your skin from within. Support your muscles, joints, and ligaments.

GATHERING INSIGHT Why we all need collagen

– **MICHAEL R. LYON, MD**

“Collagen is one of the most amazing biological molecules. Collagen makes up 25–30% of the total protein in the human body, and every organ depends on collagen for structure and function. Collagen fibres are woven through every cell and organ forming a flexible and strong internal skeleton. Collagen is constantly being broken down by the microscopic trauma that occurs

with movement and exercise and it has to be constantly repaired and replenished. Supplementing the diet with collagen has been shown to improve skin youthfulness, restore suppleness, reduce pain from aging muscles and joints, strengthen heart function, improve bone strength, and improve wound healing.”

The power of collagen to revitalize, restore, and protect our *total body*

GAETANO MORELLO, ND – “It has been my clinical observation with thousands of patients that taking protein and collagen in the morning consistently creates positive outcomes in energy levels, cognitive and immune function, and overall general feeling of well-being. The last two pandemic years have been filled with added complications as both external and internal stressors reached peak levels. This is where nutrition becomes even more important and utilizing collagen as a protein source a great path forward. Clinical data has shown the importance of collagen in maintaining healthy skin and joints. As we age our bodies produce less collagen, correlating with the increase in fine lines, wrinkles, and joint pain. Clinical

studies show that increase in stress levels (and we are all stressed) stimulates elevation in cortisol, which degrades collagen. A consequence of this degradation is a reduction in the firmness of the skin (leading to an increase in fine lines and wrinkles) and a possible stiffening of joints. It would be logical to assume that a fortified collagen supplement (collagen lacks tryptophan, thus adding tryptophan creates a fortified collagen or a complete protein) would be a great nutritional answer to these issues that many of us face.”

WISE ADVICE “Regularly add collagen to your diet.” Why?

– **JULIE REIL, MD** and Beauty Expert

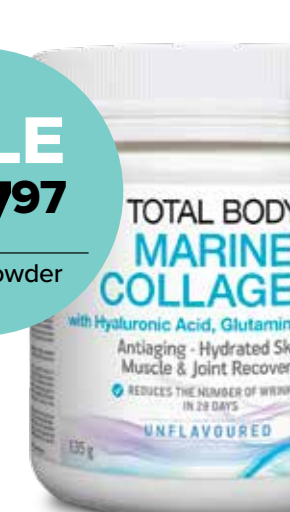

“When it comes to feeling good and looking good, I am going to share my secret weapon... it is called **Total Body Collagen**. I take it with a vitamin C supplement in the morning for my hair, skin, nails, and bones, and it couldn't be easier. With **Total Body Collagen**, my hair is thicker and healthier and I lose less hair in the shower and in my brush. Fine lines and wrinkles on my face are getting better as I age and my skin looks and feels more hydrated. My nails are stronger with fewer ridges and grow much faster. As an added bonus, Total Body Collagen supports my bone matrix for healthy teeth and bone density.”

Is collagen good for men? Absolutely.
